

ANNUAL STATISTICAL SUPPLEMENT

 for 2006

2007 Edition

10 August 2007

With effect from the 2007 Edition, the *Annual Statistical Supplement* and User's Guide will take on a different format. The statistical supplement will continue to be produced in PDF/hard-copy format while the *Glossary and User's Guide* will be a separate web-based publication at www.oilmarketreport.org. Fully interactive, the new online Glossary and User Guide allows the reader to search, sort and print detailed information on data sources, definitions, technical terms and the underlying methodology used in preparing the *Oil Market Report (OMR)* and *Medium-Term Oil Market Report (MTOMR)*.

This Statistical Supplement has been prepared to provide a longer historical perspective for the oil demand, supply, trade, stocks, prices and refining data than is normally included in the *OMR*. Readers requiring further details on individual countries are referred to the following IEA publications, for OECD countries: *Oil Information*, and for Non-OECD countries: *Energy Statistics of Non-OECD Countries* and *Energy Balances of Non-OECD Countries*. Quarterly data are available in *Quarterly Statistics, Oil, Gas, Coal and Electricity* and *Energy Prices and Taxes*. Data in this supplement reflect the most current available information at the point of publication for years up to and including 2006. However, since data revisions are received every month, data published in future *OMRs* will differ; they are also updated in the *Monthly Oil Data Service (MODS)*.

The IEA Monthly Oil Data Service

A Unique Source of Official Statistical Data on the Global Oil Market

The Most Comprehensive and Up-to-Date Information Available
on the Global Oil Market

The IEA *Monthly Oil Data Service (MODS)* provides a detailed database of historical and projected information used in preparing the IEA *Oil Market Report (OMR)*. This service comprises **three packages**, available separately or combined, on a subscription basis via the **Internet (<http://modsinfo.iea.org>)**. The MODS service is updated with the most recently-available data on the day of official release of the OMR.

A dynamic software package is included allowing user-friendly access and manipulation of the data tables. Alternatively, data text files are made available to facilitate the direct importing of tables into other database software. Unless otherwise stated, each package includes historical data back to January 1984. Packages include:

1. Supply, Demand, Balances and Stocks:

- **Supply:** monthly, quarterly and annual supply for crude, NGL and non-conventional oils in individual OECD and Non-OECD countries with aggregates shown for the three OECD regions, North America, Europe and Pacific. Data are reported in thousand barrels per day and include six to 18 months of forecasts.
- **Demand:** monthly, quarterly and annual demand data for 10 products in individual OECD countries and aggregated by OECD region; total quarterly and annual demand for Non-OECD countries. The non-OECD dataset starts in 1991. Both datasets are reported in thousand barrels per day and include six to 18 months of forecasts.
- **Balances:** monthly supply and demand balances for individual OECD countries, presenting indigenous production, imports, exports, stock changes, refinery intake and output, international marine bunkers and deliveries for inland consumption for 20 products. Data are reported in thousand metric tonnes.
- **Stocks:** comprehensive monthly coverage of industry and government-controlled stock data in individual OECD countries and for the three OECD regions, covering crude oil, NGL and feedstocks, motor gasoline, middle distillates residual fuel oil and other products. Data are reported in thousand barrels. Historical monthly data back to January 1988, data from 1984 to 1987 are available on a quarterly basis.

2. **Trade:** Monthly information on OECD Member countries' imports from over 90 origins and exports to over 80 destinations for 21 products. Included are: crude oil, NGL, motor gasoline, gas/diesel oil, residual fuel oil and 16 other products. Data are reported in thousand metric tonnes.

3. **Field-by-Field Supply:** Monthly, quarterly and annual production, starting in 1993 and including the forecast period covered in the *OMR* (six to 18 months) and forecasts for over 900 fields, streams or aggregates in 95 OECD and Non-OECD countries. Data are reported in thousand barrels per day.

A 'demo' service is available for clients interested in purchasing the MODS; if you would like access to this or require further information, please send an e-mail to: stats@iea.org. Order online at <http://modsinfo.iea.org>.

The IEA Monthly Oil Data Service (MODS)

A Unique Source of Official Statistical Data on the Global Oil Market

How to Subscribe: Please address this order to:

Energy Statistics Division, IEA, 9 rue de la Fédération, 75739 PARIS Cedex 15, FRANCE
or by **Fax: +33 (0) 1 40 57 66 49** or to the IEA web site at: <http://modsinfo.iea.org>

1 Historical demand figures may not correspond to previous publications due to revisions in base levels and conversion factors of oil products.

2 Figures for FSU are Monthly Oil Market Report estimates.

3 Figures for China are Monthly Oil Market Report estimates.

4 Figures for Latin America include Brazilian demand for alcohol fuels.

5 Measured as deliveries from refineries and primary stocks. Comprises inland deliveries, international marine bunkers and refinery fuel. It includes crude for direct burning, oil from non-conventional sources and other sources of supply.

6 Ecuador is included in OPEC through 1992, and in Latin America from 1993, Gabon is included in OPEC through 1994, and in Africa from 1995.

Angola joined OPEC in 2007 but is included here within Africa/Non-OPEC totals.

7 Net volumetric gains and losses in refining process (excluding net gain/loss in former USSR, China and non-OECD Europe) and marine transportation losses.

8 Comprises Fuel ethanol and biodiesel supply from outside Brazil and US.

9 Comprises crude oil, condensates, NGLs, oil from non-conventional sources and other sources of supply.

10 Includes changes in non-reported stocks in OECD and non-OECD areas.

1 Historical demand figures may not correspond to previous publications due to revisions in base levels and conversion factors of oil products.

2 Figures for FSU are Monthly Oil Market Report estimates.

3 Figures for China are Monthly Oil Market Report estimates.

4 Figures for Latin America include Brazilian demand for alcohol fuels.

5 Measured as deliveries from refineries and primary stocks. Comprises inland deliveries, international marine bunkers and refinery fuel. It includes crude for direct burning, oil from non-conventional sources and other sources of supply.

6 Ecuador is included in OPEC through 1992, and in Latin America from 1993, Gabon is included in OPEC through 1994, and in Africa from 1995.

Angola joined OPEC in 2007 but is included here within Africa/Non-OPEC totals.

7 Net volumetric gains and losses in refining process (excluding net gain/loss in former USSR, China and non-OECD Europe) and marine transportation losses.

8 Comprises Fuel ethanol and Biodiesel supply from outside Brazil and US.

9 Comprises crude oil, condensates, NGLs, oil from non-conventional sources and other sources of supply.

10 Includes changes in non-reported stocks in OECD and non-OECD areas.

1 Historical demand figures may not correspond to previous publications due to revisions in base levels and conversion factors of oil products.

2 Figures for FSU are Monthly Oil Market Report estimates.

3 Figures for China are Monthly Oil Market Report estimates.

4 Figures for Latin America include Brazilian demand for alcohol fuels.

5 Measured as deliveries from refineries and primary stocks. Comprises inland deliveries, international marine bunkers and refinery fuel. It includes crude for direct burning, oil from non-conventional sources and other sources of supply.

6 Ecuador is included in OPEC through 1992, and in Latin America from 1993, Gabon is included in OPEC through 1994, and in Africa from 1995.

Angola joined OPEC in 2007 but is included here within Africa/Non-OPEC totals.

7 Net volumetric gains and losses in refining process (excluding net gain/loss in former USSR, China and non-OECD Europe) and marine transportation losses.

8 Comprises Fuel ethanol and Biodiesel supply from outside Brazil and US.

9 Comprises crude oil, condensates, NGLs, oil from non-conventional sources and other sources of supply.

10 Includes changes in non-reported stocks in OECD and non-OECD areas.

¹ Includes net deliveries of oil product from refineries and primary storage, plus refinery fuel use, international marine bunkers, crude for direct burning and non-conventional oils.

Source: *Energy Statistics of Non-OECD Countries 2004-2005 (Edition 2007)*. Figures in the table are constructed on a different basis from that employed in the rest of this supplement.

² FSU demand is an estimate of actual demand. After 1994, naphtha demand for Russia has been included in "other products".

³ China demand is an estimate of actual demand.

⁴ Figures differ from those used in the Monthly Oil Market Report (shown in Tables 1 and 2 of the Annual Statistical Supplement).

¹ Includes net deliveries of oil product from refineries and primary storage, plus refinery fuel use, international marine bunkers, crude for direct burning and non-conventional oils.

Source: *Energy Statistics of Non-OECD Countries 2004-2005 (Edition 2007)*. Figures in the table are constructed on a different basis from that employed in the rest of this supplement.

² Includes alcohol fuels demand.

³ China demand is an estimate of actual demand.

⁴ Figures differ from those used in the Monthly Oil Market Report (shown in Tables 1 and 2 of the Annual Statistical Supplement).

⁵ FSU demand is an estimate of actual demand.

¹ Ecuador is included in OPEC through 1992, and in Latin America from 1993. Gabon is included in OPEC through 1994, and in Africa from 1995.

Angola joined OPEC in 2007 but is included here within Africa/Non-OPEC totals.

² Includes condensates reported by OPEC countries, oil from non-conventional sources, e.g. Venezuelan Orimulsion (but not Orinoco extra-heavy oil), and non-oil inputs to Saudi Arabian MTBE. Orimulsion production will reportedly cease from January 2007.

³ Comprises crude oil, condensates, NGLs and oil from non-conventional sources.

⁴ Includes small amounts of production from Israel, Jordan and Bahrain.

⁵ Net volumetric gains and losses in refining (excludes net gain/loss in FSU, China and non-OECD Europe) and marine transportation losses.

⁶ Includes Fuel ethanol and Biodiesel supply from outside Brazil and US.

¹ Stocks are primary national territory stocks on land (excluding utility stocks and including pipeline and entrepot stocks where known) and include stocks held by industry to meet IEA, EU and national emergency reserve commitments and are subject to government control in emergencies.

² Total products includes gasoline, middle distillates, fuel oil and other products.

³ Total includes NGLs, refinery feedstocks, additives/oxygenates and other hydrocarbons.

1 Stocks are on land primary stocks. They include stocks held by industry to meet IEA, EU and national emergency commitments and are subject to government control in emergencies. From 1 January 1991 onwards (unlike earlier years) they are on a national territory rather than an ownership basis; they exclude power station stocks and include pipeline and entropot stocks, where known. Stocks at end of 1990 are shown on both bases.

2 Note that days of forward demand represent the stock level divided by the forward quarter average daily demand for petroleum products.

3 Stock holding organisations established in some European countries to hold mandatory stocks.

4 In 1995, break in series between Industry and Organisation stocks is due to reclassification of Spanish stocks.

1 Stocks are on land primary stocks. They include stocks held by industry to meet IEA, EU and national emergency commitments and are subject to government control in emergencies. From 1 January 1991 onwards (unlike earlier years) they are on a national territory rather than an ownership basis; they exclude power station stocks and include pipeline and entropot stocks, where known. Stocks at end of 1990 are shown on both bases.

2 Note that days of forward demand for petroleum products represent the stock level divided by the forward quarter average daily demand. Days of Crude oil stocks are based on refinery throughputs for the next month.

3 "Other Products" category includes other refined petroleum products. This category does not include NGLs, refinery feedstocks, additives/oxygenates and other hydrocarbons.

1 Stocks are on land primary stocks. They include stocks held by industry to meet IEA, EU and national emergency commitments and are subject to government control in emergencies. From 1 January 1991 onwards (unlike earlier years) they are on a national territory rather than an ownership basis; they exclude power station stocks and include pipeline and entropot stocks, where known. Stocks at end of 1990 are shown on both bases.

2 Note that days of forward demand for petroleum products represent the stock level divided by the forward quarter average daily demand. Days of Crude oil stocks are based on refinery throughputs for the next month.

3 "Other Products" category includes other refined petroleum products. This category does not include NGLs, refinery feedstocks, additives/oxygenates and other hydrocarbons.

1 From July 2004 the assessment for MED is for Premium Unleaded 50 ppm, prior to this date the assessment is for Premium 0.15g/l (leaded gasoline).

2 Following change of assessment, Jet Aviation Fuel for Mediterranean - Cargo FOB from 2002.

3 From November 2003 assessments for NYH are for Max 0.3% MTBE.

¹ Source: Purvin & Gertz / IEA.

For the purposes of this Report, refining margins are calculated for various complexity configurations, each optimized for processing the specific crude in a specific refining centre on a 'full cost' basis. Consequently, reported margins should be taken as an indication, or proxy, of changes in profitability for a given refining centre. No attempt is made to model or otherwise comment upon the relative economics of specific refineries running individual crude slates and producing custom product sales, nor are these calculations intended to infer the marginal values of crudes for pricing purposes.

¹ Nominal exchange rates based on *OECD Main Economic Indicators*.

² Unleaded premium (95 RON) for France, Germany, Italy, Spain, UK; regular unleaded for Canada, Japan and USA.

³ VAT excluded from prices for automotive diesel and heavy fuel oil when refunded to industry.

⁴ Kerosene for Japan.

⁵ For Canada and USA, prices refer to the average of LSFO and HSFO. For Germany, France, Italy, Japan and Spain prices refer to LSFO. For UK, prices refer to HSFO.

¹ Based on Monthly Oil Questionnaire data submitted by OECD countries in tonnes, and converted to barrels at 7.37 barrels per tonne. Data will differ from that in the "Oil Information" Annual and also from that in Table 22 of this Supplement, the latter based on submissions in barrels.

² West Africa includes Angola, Nigeria, Gabon, Congo and Democratic Republic of Congo.

¹ Data based on monthly submissions from IEA countries to the crude oil import register (in '000 bbl), subject to availability. May differ from Table 21 of the Report.

IEA Europe weighted average includes the Czech Republic from 2001 onwards. Hungary is not included.

IEA Pacific weighted average includes Korea from 2001 onwards.

² Iraqi Total minus Kirkuk.

³ Iranian Total minus Iranian Light.

⁴ 33 API and lighter (e.g., Bonny Light, Escravos, Pennington, Qua Iboe and Oso Condensate).

1 Based on Monthly Oil Questionnaire data submitted by OECD countries in tonnes. Data differs from that published in the "Oil Information" Annual. Gasoline is the sum of motor gasoline, aviation gasoline, jet gasoline and additives.

2 Total figure excludes intra-regional trade.

The International Energy Agency ('IEA') makes every attempt to ensure, but does not guarantee, the accuracy and completeness of the information or the clarity of content of the *Oil Market Report*, including the *Annual Statistical Supplement* (hereafter the '*OMR*'). The IEA shall not be liable to any party for any inaccuracy, error or omission contained or provided in this *OMR* or for any loss, or damage, whether or not due to reliance placed by that party on information in this *OMR*.

The Executive Director and Secretariat of the IEA are responsible for the publication of the *OMR*. Although some of the data are supplied by IEA Member-country governments, largely on the basis of information they in turn receive from oil companies, neither these governments nor these oil companies necessarily share the Secretariat's views or conclusions as expressed in the *OMR*. The *OMR* is prepared for general circulation and is distributed for general information only. Neither the information nor any opinion expressed in the *OMR* constitutes an offer, or an invitation to make an offer, to buy or sell any securities or any options, futures or other derivatives related to such securities.

This *OMR* is the copyright of the OECD/IEA and is subject to certain terms and conditions of use. These terms and conditions are available on the IEA website at <http://www.iea.org/oilmar/licenceomr.html>. In relation to the Subscription Edition (as defined in the *OMR*'s online terms and conditions), the spot crude and product price assessments are based on daily Platts prices, converted when appropriate to US\$ per barrel according to the Platts specification of products (© Platts – a division of McGraw-Hill Inc.). Any reproduction of information from the spot crude and product price tables requires the prior permission of Platts.
